### WORK EXPERIENCE

#### **Kyruus**, Software Engineer I

NOVEMBER 2020 - February 2023

Gained experience working on two Agile software development teams, in both Scrum and Kanban environments, as a member of the Customer Onboarding team, then the Core Application Services team.

As a member of the Customer Onboarding team - maintained and modernized an ETL pipeline, configured new customers' pipeline ingestions, streamlined and automated configuration processes, and maintained various related microservices. Work on this team utilized primarily Python, Jenkins, PostgreSQL, and various AWS services such as EC2, EMR, Lambda, and S3. Collaborated across teams, specifically with customer facing teams, to ensure consistent delivery of services and timely resolution to various issues.

As a member of the Core Application Services team - involved in full-stack development of Kyruus' primary internal services including a customer management service, user management service, and application authentication service. Utilized Python (Flask) and PostgreSQL on backend and TypeScript with React on frontend. Gained experience in migration of microservices and libraries onto new CI/CD pipeline while also continuing services on legacy CI/CD pipeline. Contributed to major overhaul of authentication services to address various security vulnerabilities within legacy applications. Lead development of a feature which automated a previously manual process, eliminating multiple sprints worth of engineering work.

### SKILLS

**Python - JavaScript (ES6+) -  
Ruby - TypeScript - Flask -  
React - SQL - Node.js -  
Jenkins - Docker - Bash -  
AWS - CircleCI - RESTful  
API - CI/CD - Git**

### EDUCATION

**Flatiron School**, Online  
Software Engineering  
June 2019 - November 2019

**Louisiana State University**  
Political Science  
2002 - 2006  
Relevant coursework in  
Computer Science and  
Computer Engineering

#### **Freelance Web Development**

JANUARY 2020 - NOVEMBER 2020

Created websites for various clients. Delivered projects based on stakeholder design specifications. Utilized minimal tooling to meet requirements and deploy projects in an efficient manner. Portfolio examples available on request.

## NON-TECHNICAL WORK EXPERIENCE

### **Union Square Hospitality Group**, Bartender II - New York, NY

JUNE 2019 - MARCH 2020

Organized and streamlined systems resulting in increased efficiency leading to regularly exceeding sales projections, trained and educated bar and dining room teams, recruited talented new members to the bar team.

### **Marliave**, Manager - Boston, MA

JUNE 2011 - DECEMBER 2018

Promoted from server to bartender to espresso bar manager. Managed opening and operation of new espresso bar, implemented systems for daily operations, training programs
